Comfortable:
Node JS, MongoDB, Express JS, Stripe

Familiar:
MySQL

Tools:
VS code, Chrome devtool, Netlify, GitHub, Heroku, Firebase, Figma, NPM

Language

Bangla
English (Conversational)

Summery

As a MERN stack web developer I use HTML, CSS3, Tailwind CSS, Bootstrap CSS, and some libraries for styling. I build a website based on user interactions along with little bit of designing and responsive user interface by deploying React concepts. I write the application code via JavaScript and ReactJS. For backend I use Mongo dB(no-sql) database.

Projects

- ### AutoZone || Live-site || Client || Server
  - This site is based selling car parts as a manufacturer.
  - This is a full stack project
  - Have register and login system
  - Added firebase authentication
  - Also have admin panel for management
